

PURPOSE

It is the purpose of these standards and procedures to insure that all water distribution and sewage collection and treatment systems, constructed in the City of Barnesville or connected to the City of Barnesville system, satisfy all existing and future City of Barnesville, State, and Federal regulations.

After the passage of this resolution, water and sewer systems in the City of Barnesville shall be constructed only after the plans have been approved as outlined in these standards. Only systems constructed in accordance with these standards will be allowed to connect to the City of Barnesville Water or Sewer System either immediately following construction or at any time in the future.

Connections to the City of Barnesville system in unincorporated Lamar County must be approved by the City of Barnesville before water can be used in a new system connected to the City of Barnesville System. The system must first receive final inspection and approval from the City of Barnesville Water and Sewer Department.
