David M. Waltz  
City Manager

August 12, 2021

**Attention Blue Ash Resident:**

The City of Blue Ash has contracted with Barret Paving Materials Inc. for this year's Paving Program. Work is expected to start the week of September 7, 2021. The construction is expected to last about 2 weeks for all streets included in this year's program to be resurfaced.

During the construction Barrett will have a crew mill off and clean the top 2" of pavement. The City will at this time mark deteriorated areas in need of further repair. Once repairs have been completed, Barrett will begin the resurfacing of the pavement. "No Parking" signs will be placed on both sides of the road the day before the milling operation and the day before the resurfacing operation. This is to ensure that no obstructions will prevent paving of the new road. Traffic will still be allowed to get through and residents will be able to access driveways, however minor delays should be expected.

Pictures of construction and what to expect have been included with this letter.

We appreciate your cooperation and understanding on this matter. Questions regarding the work should be directed to Will Davis at 745-8536 during regular office hours (weekdays between 8 AM and 5 PM), or to [wdavis@blueash.com](mailto:wdavis@blueash.com).

Thank You,

Will Davis  
Engineering Technician
