

NOTICE TO INDUSTRY
UTILITY APPLICATIONS FOR NEW CONSTRUCTION
EFFECTIVE Monday, July 1st, 2024

Please be advised that effective July 1st, 2024, all applications for new construction utility accounts will require completed applications from both the builder/contractor and the property owner.

This change will eliminate unnecessary service interruptions for the property owner at closing and will also expedite a builder's request for disconnection when the home is complete.

Applications, along with proper identification, can be submitted online at https://egov.capecoral.gov/cbs_web_forms/NewConstructionapp.aspx or in person at City Hall, 1015 Cultural Park Blvd, Cape Coral, FL 33990.

Once both applications are received, the account will be established with all pertinent information.

Builders are reminded that once the utility account is established, the installation of meters will still need to be requested in Energov following the UTL – Kit A/Meter Install process.

Any questions, please contact New Construction at 239-242-3853.
