

NOTICE TO INDUSTRY

Fiber Optic

EFFECTIVE Friday, March 29, 2024

Beginning March 29, 2024, all Construction Permits will include an informational hold if City fiber optic infrastructure is located at the property. A Plans Examiner will review the application for design conflicts with the infrastructure.

The City will relocate City fiber optic infrastructure in conflict with building plans, as determined by the Plans Examiner. However, contractors will be responsible for the repair costs associated with any damage to fiber optic infrastructure caused by the contractors or their assigned subcontractors. A fee will be added to the permit for any repair required.

The contractor should always use Sunshine 811 before digging in the right of way at any construction location.

More information on City fiber optic infrastructure can be found at <http://www.capecoral.gov/fiberoptic>
