About this Report

As part of its participation in The National Community Survey™, the City of Cape Coral conducted a mailed survey of 1,600 residents. Surveys were mailed to randomly selected households in April 2019 and data were collected through May 17, 2019 (see the report, *The National Community Survey: Community Livability Report, Cape Coral, FL, 2019*). The results from this main survey effort represent the most robust estimate of your residents' opinions.

After the above data collection period was underway, the City made available a web-based survey to its residents through a link on the City's website. Visitors to the site were able to complete the survey between May 3 and May 17 and 1,688 surveys were received. This report contains the results of this opt-in administration of the web-based survey. These data were not collected through a random sample and it is unknown who in the community was aware of link on the City's website; therefore a level of confidence in the representativeness of the sample cannot be estimated. However, to reduce bias where possible, these data were weighted to match the demographic characteristics of the 2010 Census and American Community Survey estimates for adults in the City of Cape Coral.

The results of the weighting scheme for the opt-in survey are presented in the following table.
