City of Cape Coral

FY 2011 Utility Revenue Sufficiency Analysis

Water, Sewer & Irrigation Rate Study

Final Report

September 10, 2011

Prepared by:

Burton & Associates

September 10, 2011

Ms. Sheena Milliken Management/Budget Administrator City of Cape Coral PO Box 150027 Cape Coral, FL 33915-0027

Re: FY 2011 Utility Revenue Sufficiency Analysis – Final Report

Dear Ms. Milliken:

Burton & Associates is pleased to present this Final Report of the FY 2011 Utility Revenue Sufficiency Analysis that we have performed for the City's Water, Sewer, and Irrigation Utility Systems.

We appreciate the fine assistance provided by you and all of the members of City staff who participated in the analysis.

If you have any questions, please do not hesitate to call me at (904) 247-0787.

Sincerely,

Andrew J. Burnham Senior Vice President

Enclosure

SECTION 1. INTRODUCTION

Burton & Associates has conducted a comprehensive Utility Revenue Sufficiency Analysis (RSA) for the City of Cape Coral Water, Sewer, and Irrigation Utility Systems (Utility). This report describes in detail the assumptions, procedures, results, as well as the conclusions and recommendations of the RSA.

1.1 BACKGROUND & OBJECTIVES

Historically, Burton & Associates has prepared an annual RSA for the Utility that measures the sufficiency of its revenues to meet all current and projected financial requirements over a multi-year projection period and determines the level of rate revenue increases necessary in each year to provide sufficient revenues to fund all of the Utility's requirements, including operating expenses, capital costs, and debt service requirements.

In 2006, the City adopted and implemented a four-year rate adjustment program based on the continuation of its Utility Expansion Program (UEP). Subsequent to the adoption of that program, Burton & Associates performed a RSA in May 2008 which provided several scenarios, ranging from continuing the UEP program for water and sewer, to water only, and to ceasing the program altogether. Recommended changes to the rate adjustment plan from that analysis were not implemented.

For the fiscal year ending September 30, 2008, the City did not meet its rate covenant as required by the bond documents for the existing water & sewer revenue bonds. The rate covenant requires that the net revenue of the water and sewer system be at least equal to annual debt service requirements (i.e. a minimum ratio of net revenue to debt service of 1.0), however, the net revenues for FYE 2008 were actually less than the annual debt service (the ratio of net revenue to debt service was only .88). Since that time, City staff has implemented measures to help ensure that the required coverage will be met, such as monitoring net revenues on a monthly basis and continually updating the net revenue forecast through the end of each fiscal year.

Pursuant to the City's rate covenant for its water and sewer revenue bonds, when the City fails to maintain adequate net revenue it is required to engage a rate consultant to update water and sewer rates to ensure adequate net revenue in the future for operations, maintenance, and debt service expenses. As such, the City re-engaged Burton & Associates to perform a RSA that was completed in March of 2009 (hereafter referred to as the "2009 Rate Study").

The 2009 Rate Study reflected the most current available capital and operating plans, assumptions and cost escalation factors based upon then-current and expected market conditions, and the City Council's decision to discontinue the UEP program entirely. As a result of the 2009 Rate Study, the City approved a five-year plan of rate adjustments as identified in the table below (of which only the FY 2010 adjustment was implemented):

APPROVED RATE ADJ.	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Water	30.00%	15.00%	15.00%	15.00%	3.50%
Sewer	30.00%	15.00%	15.00%	15.00%	3.50%
Irrigation	0.00%	0.00%	0.00%	0.00%	0.00%
Avg. Res. Bill (5,000 GAL)	\$97.87	\$111.13	\$126.37	\$143.91	\$148.61
Monthly Bill Increase / Yr.	\$20.39	\$13.26	\$15.24	\$17.53	\$4.70

Upon completion of the 2009 Rate Study, the City Council requested that City Staff provide options for consideration that would achieve the goal of reducing the remaining plan of approved rate adjustments. As such, the City again engaged Burton & Associates to perform a RSA in FY 2010 (hereafter referred to as the "2010 Rate Study") to update to the 2009 Rate Study based upon current data and economic assumptions in order to 1) evaluate the adequacy of the remaining rate adjustments to provide sufficient annual revenues to meet the updated cost requirements of the Utility without resuming the UEP program, and 2) identify the annual rate adjustments associated with alternative options

developed by City staff, legal counsel, as well as the City's rate consultants and financial advisor (collectively called the "Working Group") intended to reduce the plan of approved rate adjustments.

The 2010 Rate Study reflected the most current available capital and operating plans (which included the implementation of certain operating and capital cost savings and efficiency measures), assumptions and cost escalation factors based upon then-current and expected market conditions, and the City Council's decision to discontinue the UEP program entirely. As a result of the 2010 Rate Study, the City approved a revised five-year plan of rate adjustments as identified in the table below (of which only the FY 2011 adjustment has been implemented to date):

APPROVED RATE ADJ.	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015
Water	8.00%	8.00%	8.00%	3.50%	3.50%
Sewer	8.00%	8.00%	8.00%	5.50%	3.50%
Irrigation	0.00%	0.00%	0.00%	0.00%	0.00%
Avg. Res. Bill (5,000 GAL)	\$104.97	\$112.61	\$120.84	\$124.75	\$128.75
Monthly Bill Increase / Yr.	\$7.10	\$7.64	\$8.23	\$3.91	\$4.00

Upon completion of the 2010 Rate Study, City Staff has continued to implement cost reduction and efficiency measures and explore the alternative options presented in the 2010 Rate Study to achieve the goal of reducing the near-term plan of rate adjustments. As such, the City has again engaged Burton & Associates to perform a RSA in FY 2011 to update to the 2010 Rate Study based upon current data and economic assumptions to 1) evaluate the level of the approved rate adjustments in light of the updated cost requirements of the Utility without resuming the UEP program, and 2) identify the annual rate adjustments associated with the alternative options developed by the Working Group as part of the 2010 Rate Study.

SECTION 2. BASIS & ASSUMPTIONS OF ANALYSIS

The RSA first identified the level of annual water, sewer, and irrigation revenue (and rate adjustments) required over a near-term planning period (FY 2012 – FY 2016) and long-term projection period (FY 2012 – FY 2021) to meet all of the Utility's updated financial requirements assuming that the UEP is not resumed in any form. Next the RSA identified the level of annual required revenue (and rate adjustments) for each of the rate adjustment reduction options as presented by the Working Group to City Council at its May 19, 2010 Committee of the Whole Meeting¹. The following sub-sections present the basis and assumptions of the RSA, while the remaining sections of the report present the results of the RSA as well as our conclusions and recommendations.

2.1 BASIS

The RSA was performed using both historical and projected information. Historical financial information for FY 2010 was provided by City staff in order to establish the beginning FY 2011 balances for each of the various funds for the Utility. It is important to note that funds reserved or encumbered for specific capital projects were included in the beginning fund balances available for capital projects in FY 2011 and the associated capital project costs were included in the capital improvement plan in FY 2011.

The revenue utilized in the RSA consists of retail rate revenue, interest earnings, impact and betterment fee revenue, and other minor revenue from miscellaneous service charges. Future rate revenue is based upon estimated FY 2011 results (which reflect 9 months of actual data extrapolated for the full fiscal year), adjusted annually to reflect additional revenue from assumed rate increases and customer growth. All other non-rate revenues reflect estimated FY 2011 results (which reflect 9 months of actual data extrapolated for the full fiscal year). The future projections of all other non-rate revenues were based

¹ The May 14, 2010 City staff memorandum includes the Funding Alternatives Report (May, 2010) prepared by the Working Group that contains the options presented to the City Council.

upon the FY 2012 Proposed Budget, excluding water and sewer impact and betterment fee revenue (which was calculated annually based upon the projected number of new connections) and interest earnings (which were calculated annually based upon projected average fund balances and assumed interest rates).

The operating expenditure requirements (inclusive of all operating and maintenance expenses, debt service requirements, inter-fund transfers, and minor capital outlay requirements) for FY 2011 are based upon estimated results (which reflect 9 months of actual data extrapolated for the full fiscal year), while FY 2012 reflects the FY 2012 Proposed Budget. After FY 2012, operating expenditure requirements were projected based upon prior year amounts adjusted for assumed cost escalation factors for individual expense categories, excluding debt service (which reflects the identified annual repayment schedules for each financing). The capital improvement program utilized in the RSA was provided by City staff and is presented in project-level detail by year in Appendix A.

2.2 ASSUMPTIONS

The following presents the assumptions, base data, and parameters utilized in the RSA:

2.2.1 Adjustments to Revenues & Expenditures

The following adjustments were made to the projections of future revenue and expenditures described in the preceding sub-section. All adjustments extend through the remainder of the projection period (unless otherwise noted) and are adjusted annually based upon the appropriate growth, rate adjustment, or cost escalation factors.

- ➤ Bio-Solids partnership operating expense savings: (\$750,000) in FY 2012
- ➤ One-time proceeds from the sale of bio-solids equipment: \$3,700,000 in FY 2012
- ➤ One-time Lee County Impact Fee Reimbursement for North Del Prado Water Main Extension: \$1,872,017 in FY 2011
- ➤ One-time workers compensation adjustment: (\$211,113) in FY 2012
- ➤ Incremental O&M from ASR Wells: \$200,000 in FY 2016

2.2.2 Cost Escalation

Annual cost escalation factors for the various types of operating and maintenance (O&M) expenses were discussed with City staff and applied in each year of the projection period beginning in FY 2013. These specific factors can be seen on Schedule 1 included in Appendix A of this report and are based upon City staff and management input, recent history, industry trends, and current known and measurable factors/circumstances.

2.2.3 Growth

Forecasted new water, sewer, and irrigation connections were provided by City staff. Prior to the 2009 Rate Study, the City had more robust growth projections that reflected the continuation of the UEP program, large meter connections for commercial construction (meter size equates to number of units), and new construction in areas currently served by water and sewer. However, given City Council's decision to discontinue the UEP and the current economic conditions resulting in a significant drop off in construction, historical forecasts of annual units connecting to the Utility have not and will not be met. As such, this RSA (as with the 2009 and 2010 Rate Studies) reflects very modest future annual growth rates ranging from less than 0.5% in FY 2012 to approximately 1% by FY 2016 to slightly less than 1.5% by FY 2021. The specific annual growth units assumed in the RSA can be seen on Schedule 1 of Appendix A of this report. It is important to note that the annual growth in the irrigation system is assumed to be at 80% of the forecasted growth for the water system. It is also important to note that City staff provided growth schedules that were used in evaluating the UEP options as prepared and presented by the Working Group.

2.2.4 Price Elasticity

This adjustment is incorporated into the RSA to reflect that as rates increase, discretionary water consumption will likely decline. Therefore, in order to generate sufficient revenue, projected rate increases will have to be adjusted to reflect a smaller revenue base to which they will be applied, thus causing the projected rate increases to be larger. The price elasticity adjustment reduces the discretionary portion of consumption-based revenues by the product of the annual rate increase and the annual assumed elasticity coefficient. In each year of the projection period, the price elasticity coefficient

FY 2011 UTILITY REVENUE SUFFICIENCY ANALYSIS

BASIS & ASSUMPTIONS OF ANALYSIS

assumed is 0.15, which means that for every 10% increase in price, the RSA reflects a 1.5% reduction in water, sewer, and irrigation consumption-based revenues.

2.2.5 Interest Earnings on Invested Funds

It is assumed interest earnings on invested funds would be 0.5% in FY 2011, 1.0% in FY 2012, 1.5% in FY 2013, 2.0% in FY 2014, and 2.5% in FY 2015 and each subsequent year of the projection period.

2.2.6 Irrigation Rate Adjustments

The RSA does not reflect any adjustments to irrigation rates during the projection period.

2.2.7 Impact Fees

The projections of impact fee revenues are based upon the annual number of additional equivalent residential units added to the water, sewer, and irrigation systems respectively each year and the current approved impact fees. It is important to note that it is assumed that 100% of projected new connections provide cash impact fees and that 100% of State Revolving Fund (SRF) Loan debt service can be paid for with sewer impact fee revenue.

2.2.8 Capital Improvement Program

The capital improvement program (CIP) prepared by City staff from FY 2011 through FY 2021 is included in the RSA by project. In the last four years of the projection period, additional unspecified capital improvement cost allowances were made to supplement the CIP as provided by City staff. It is important to note that City staff also confirmed the capital costs associated with resuming the UEP in the North 1-8 and SW 6/7 expansion areas that were used in the preparation of the UEP options by the Working Group.

2.2.9 Plan of Finance

The RSA reflects the final pricing for the Series 2011 Bonds that were issued for a par amount of \$175 million² with an average true interest cost of 4.93%. This bond, plus other sources of funds, refunded the Series 2009 Bond Anticipation Note and refinanced

² Debt schedule provided by the City's financial advisor, RBC Capital Markets.

FY 2011 UTILITY REVENUE SUFFICIENCY ANALYSIS

BASIS & ASSUMPTIONS OF ANALYSIS

\$99.2 million of outstanding commercial paper. Furthermore, an additional \$110.1 million bond^{2,3} (including \$2.3 million of costs of issuance) at an assumed 6% interest rate will be issued in FY 2012 to refinance the remaining \$107.4 million of outstanding commercial paper for the plant expansions and certain other CIP projects. This timing of debt issues and use of commercial paper is consistent with the 2009 and 2010 Rate

Studies and serves to levelize annual rate adjustments over the next two years.

2.2.10 Borrowing Assumptions

The interim financing and any other additional long-term borrowing requirements after FY 2012 are assumed to carry the following terms per discussions with the City's

financial advisor:

Long-Term Debt (Revenue Bonds):

> Term: 30 Years

Interest Rate: 6.00% in each year of the projection period

➤ Cost of Issuance: 2.00% of Par

➤ Debt Service Reserve: Equal to 1 year of annual debt service expense

Interim Financing (Commercial Paper):

Payments: Interest only payments until taken out with proceeds of long-term

debt (revenue bonds)

➤ Interest Rate: 3.0% in each year of the projection period

³ At the end of FY 2010, the Utility portion of the outstanding commercial paper was \$203.6 million;

however, \$3.0 million was added to the line of credit for CIP funding in FY 2011. As the Series 2011

Bonds refinanced \$99.2 million of commercial paper, the remaining amount of 107.4 million, plus an

additional \$0.4 million for CIP funding in FY 2012, represents the total proceeds of the Series 2012 Bonds.

⁴ Rate provided by City's financial advisor and is grossed up to reflect the anticipated annual costs to

maintain availability of commercial paper.

2.2.11 Debt Service and Coverage

The debt service coverage test in the Utility's outstanding bond covenants is that net income must be at least 1.00 times annual debt service and that net income plus impact fee revenue must be at least 1.20 times annual debt service. The coverage test for the Utility's SRF loans is that net income after senior lien debt service plus impact fee revenue must be at lest 1.15 times annual SRF debt service.

It is important to note that these coverage requirements are minimum requirements. To the extent that a utility is unable to meet these requirements (as the City did in FY 2008), it could be found in technical default and would potentially have its credit rating downgraded, which would affect the interest rates and terms of future financing initiatives. As a policy decision, utilities often measure revenue sufficiency and set rates based upon a higher coverage level so as to ensure compliance with these covenants in the event future projections of revenue and expenses do not occur as predicted. As such, the RSA reflects a near-term (FY 2012 – FY 2016) debt service coverage ratio target of 1.25 (instead of the required 1.00 for net revenues excluding impact fees), which is considered "Adequate" for utility systems by one of the major municipal water and sewer utility credit rating agencies⁵. In the long-term, the RSA endeavors to achieve a debt service coverage ratio of 1.50, which is considered "Good" for utility systems by one of the major municipal water and sewer utility credit rating agencies⁵.

2.2.12 Minimum Operating Reserve

The RSA targets a minimum operating reserve equal to 3-months of operating and maintenance expenses. The level of operating reserve is within the typical industry range in Florida and is consistent with the prudent amount as identified by a recent analysis conducted by the Rates and Charges Sub-committee of the American Water Works Association (AWWA). Based upon our industry experience, water and sewer utilities will generally target a minimum working capital reserve, or operating reserve, in the range of 2 – 6 months of operating and maintenance expenses. This range is consistent

⁵ Per the published ratings criteria for water and sewer utility of Standard & Poor's (September 2008).

FY 2011 UTILITY REVENUE SUFFICIENCY ANALYSIS

BASIS & ASSUMPTIONS OF ANALYSIS

with the results of the recent analysis performed by the Rates and Charges Sub-committee of the AWWA, which concluded that adequate working capital reserves for water and sewer utility systems should be at least equal to 2 months of operating and maintenance expenses. Moreover, this amount is considered "Good" for utility systems by one of the major municipal water and sewer utility credit rating agencies⁵.

SECTION 3. RESULTS

As mentioned previously, the RSA first identified the level of annual water, sewer, and irrigation revenue (and rate adjustments) required over a near-term planning period (FY 2012 – FY 2016) and long-term projection period (FY 2012 – FY 2021) to meet all of the Utility's updated financial requirements assuming that the UEP is not resumed. The RSA then identified the level of annual required revenue (and rate adjustments) for each of the rate adjustment reduction options developed by the Working Group and presented to City Council at its May 19, 2010 Committee of the Whole Meeting⁶.

3.1 NO UEP

Similar to the 2009 and 2010 Rate Studies, this financial management plan continues to reflect the City Council's decision to discontinue the UEP program indefinitely and reflects the most current assumptions and cost data available today, such as very modest projections of new connections within the City's existing utility service area, an updated CIP, and current operating expense estimates and proposed budgets.

In comparing the current assumptions and cost data for this RSA to the projections from the 2010 Rate Study, the most significant change is the updated level of operating expense requirements for the Utility. City staff has continued to implement significant operating cost cutting initiatives, particularly at the water production and wastewater treatment facilities, that have resulted in personal service and operating and maintenance expenses being almost \$7 million less in FY 2011 and \$5 million less in FY 2012 and each year thereafter than what was included in the 2010 Rate Study. Moreover, the exploration of alternative bio-solids partnerships and processes has resulted in a significant amount of capital cost avoidance and contributed to the operating cost reductions.

⁶ Per the May 14, 2010 City staff memorandum that includes the Funding Alternatives Report (May, 2010) prepared by the Working Group.

Given that other key data points, such as revenues and capital expenditure requirements (notwithstanding the aforementioned bio-solids facility cost avoidance), are very comparable to the 2010 Rate Study, these operating cost reductions have a significant impact of the level of rate adjustment requirements of the Utility. The table below identifies the updated plan of multi-year rate adjustments that are necessary to provide sufficient revenue over the next five-year planning period to cover annual operating, maintenance, and capital costs while maintaining targeted reserve and debt service coverage levels. The rate adjustments in FY 2012 and FY 2013 are over 30% lower in each year than the previously approved annual rate adjustments for that same time period as identified in the 2010 Rate Study.

UPDATED RATE ADJ.	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Water	5.50%	5.50%	3.50%	3.50%	3.50%
Sewer	5.50%	5.50%	3.50%	3.50%	3.50%
Irrigation	0.00%	0.00%	0.00%	0.00%	0.00%
Avg. Res. Bill (5,000 GAL)	\$110.22	\$115.78	\$119.52	\$123.41	\$127.39
Monthly Bill Increase / Yr.	\$5.25	\$5.56	\$3.74	\$3.89	\$3.98

It is important to note that beginning in FY 2017, 2.50% annual rate adjustments for the remainder of the projection period would provide sufficient revenues to meet increases in operating costs, fund estimated future capital improvement requirements, maintain reserves, and meet targeted debt service coverage levels. Appendix A to this report includes detailed supporting schedules for the financial management plan reflecting the plan of annual rate adjustments identified in the table above and 2.50% annual rate adjustments thereafter for the remainder of the projection period.

3.2 ALTERNATIVE OPTIONS OF WORKING GROUP

The following sub-sections present brief descriptions of the alternative options developed by the Working Group as contained in the May, 2010 Funding Alternatives Report that was attached to the City Staff memorandum dated May, 14, 2010 and presented to City Council at its May 19, 2010 Committee of the Whole Meeting. Appendix B to this report includes summary schedules of the financial management plan for each respective option based upon the updated data and assumptions of the RSA as presented herein.

It is important to note that the RSA focuses solely on the impact of the options to future utility rate adjustment requirements based upon the parameters and assumptions contained in the Funding Alternative Report for each option and does not attempt to quantify the comprehensive impacts of each option to ratepayers or non-ratepayers.

3.2.1 Public Service Tax (Option 2)

This option involves the imposition of a city-wide public service tax on certain utilities pursuant to Section 166.231, Florida Statutes. Based upon a 10% public services tax on electric and natural gas utilities, it is estimated that the tax would generate an annual revenue stream of about \$11,000,000 per year. This revenue stream would effectively remove \$150 million of long-term borrowing requirements from utility rates. As indicated previously, the current plan of finance for the Utility includes the Series 2011 Bonds (\$175 million) and the Series 2012 Bonds (\$110 million). Removing \$150 million of this future debt from the financial management plan for the Utility would result in the plan of rate adjustments identified in the following table.

PUBLIC SERVICE TAX	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Water	0.00%	-6.50%	0.00%	3.50%	3.50%
Sewer	0.00%	-6.50%	0.00%	3.50%	3.50%
Irrigation	0.00%	0.00%	0.00%	0.00%	0.00%

Avg. Res. Bill (5,000 GAL)	\$104.97	\$98.81	\$98.81	\$101.93	\$105.13
Monthly Bill Increase / Yr.	\$0.00	(\$6.16)	\$0.00	\$3.12	\$3.20

Schedule 1 of Appendix B presents a summary of the financial management plan for this option, including key assumptions, annual rate adjustments, debt service coverage levels, operating reserves, capital improvement spending, and Utility borrowing requirements.

3.2.2 Capital Facility Expansion Charge: Prior Expansion Areas (Option 3A)

This option involves imposing a special assessment against properties not currently connected to, but that are abutting, existing utility lines for the purpose of paying for a portion of the costs associated with the construction and expansion of the City's water and sewer plant facilities and reserving capacity in such facilities. Based upon the properties in these areas (i.e. the infill in the prior utility expansion plan areas), the services available in these areas, and an assumed assessment comparable to the Utility's current impact fees for the services available would effectively allow for the removal of \$91 million of long-term borrowing requirements from utility rates. Removing \$91 million of long-term debt from the financial management plan for the Utility would result in the plan of rate adjustments identified in the table below.

CFEC: Prior UEP Areas	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Water	0.00%	0.00%	0.00%	3.50%	3.50%
Sewer	0.00%	0.00%	0.00%	3.50%	3.50%
Irrigation	0.00%	0.00%	0.00%	0.00%	0.00%
Avg. Res. Bill (5,000 GAL)	\$104.97	\$104.97	\$104.97	\$108.31	\$111.75
Monthly Bill Increase / Yr.	\$0.00	\$0.00	\$0.00	\$3.34	\$3.44

Schedule 2 of Appendix B presents a summary of the financial management plan for this option, including key assumptions, annual rate adjustments, debt service coverage levels, operating reserves, capital improvement spending, and Utility borrowing requirements.

3.2.3 Capital Facility Expansion Charge: New Expansion Areas (Option 3B)

This option involves imposing a special assessment against properties not currently connected to the Utility for the purpose of paying for a portion of the costs associated with the construction and expansion of the City's water and sewer plant facilities and reserving capacity in such facilities. Specifically, the properties subject to this assessment would be the properties in the North 1-8 and Southwest 6/7 expansion areas. Based upon the properties in these areas, the planned utility services for those areas (water only in North 1-8, and all services in Southwest 6/7), and an assumed assessment comparable to the Utility's current impact fees for the planned services would effectively allow for the removal of \$214 million of long-term borrowing requirements from utility rates. Removing \$214 million of long-term debt from the financial management plan for the Utility would result in the plan of rate adjustments identified in the table below.

CFEC: New UEP Areas	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Water	0.00%	-14.00%	0.00%	3.50%	3.50%
Sewer	0.00%	-14.00%	0.00%	3.50%	3.50%
Irrigation	0.00%	0.00%	0.00%	0.00%	0.00%
<u> </u>					
A . D . D'II (5 000 CAT)	\$104.97	\$91.59	\$91.59	\$94.46	\$97.42
Avg. Res. Bill (5,000 GAL)		·			
25 42 502 (27	\$0.00	(\$13.38)	\$0.00	\$2.87	\$2.96
Monthly Bill Increase / Yr.	4000	(420100)	40.00	Ψ 2.0 7	4-170

Schedule 3 of Appendix B presents a summary of the financial management plan for this option, including key assumptions, annual rate adjustments, debt service coverage levels, operating reserves, capital improvement spending, and Utility borrowing requirements.

3.2.4 Resume UEP: SW 6/7 Only (Option 4A)

This option involves resuming the UEP for the Southwest 6/7 areas for all utility services (water, sewer, and irrigation) and includes the imposition of capital facility expansion charges to all properties in these areas for the purpose of paying for a portion of the costs associated with the construction and expansion of the City's water and sewer plant facilities and reserving capacity in such facilities. City staff provided the additional capital costs necessary to serve these areas as well as a schedule of projected service connections (with the first connections projected to be in service mid FY 2013). Based upon the properties in these areas, planned utility services, schedule of projected service connections, and an assumed assessment comparable to the Utility's current impact fees for the services that would be available, the Utility would require the plan of annual rate adjustments identified in the table below.

Resume UEP: SW 6/7	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Water	0.00%	5.50%	0.00%	3.50%	3.50%
Sewer	0.00%	5.50%	0.00%	3.50%	3.50%
Irrigation	0.00%	0.00%	0.00%	0.00%	0.00%
Avg. Res. Bill (5,000 GAL)	\$104.97	\$110.22	\$110.22	\$113.73	\$117.39
Monthly Bill Increase / Yr.	\$0.00	\$5.25	\$0.00	\$3.51	\$3.66

Schedule 4 of Appendix B presents a summary of the financial management plan for this option, including key assumptions, annual rate adjustments, debt service coverage levels, operating reserves, capital improvement spending, and Utility borrowing requirements.

3.2.5 Resume UEP: North 1-8 Only (Option 4B)

This option involves resuming the UEP for the North 1-8 areas for water service only and includes the imposition of capital facility expansion charges to all properties in these

areas for the purpose of paying for a portion of the costs associated with the construction and expansion of the City's water plant facilities and reserving capacity in such facilities. City staff provided the additional capital costs necessary to serve these areas as well as a schedule of projected service connections (with the first connections projected to be in service mid FY 2013). Based upon the properties in these areas, planned utility services, schedule of projected service connections, and an assumed assessment comparable to the Utility's current impact fee for water service, the Utility would require the plan of annual rate adjustments identified in the table below.

Resume UEP: North 1-8	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Water	0.00%	-11.50%	0.00%	3.50%	3.50%
Sewer	0.00%	-11.50%	0.00%	3.50%	3.50%
Irrigation	0.00%	0.00%	0.00%	0.00%	0.00%
Avg. Res. Bill (5,000 GAL)	\$104.97	\$93.98	\$93.98	\$96.93	\$100.02
Monthly Bill Increase / Yr.	\$0.00	(\$10.99)	\$0.00	\$2.95	\$3.09

Schedule 5 of Appendix B presents a summary of the financial management plan for this option, including key assumptions, annual rate adjustments, debt service coverage levels, operating reserves, capital improvement spending, and Utility borrowing requirements.

3.2.6 Resume UEP: SW 6/7 & N 1-8 (Option 4C)

This option involves resuming the UEP for the Southwest 6/7 (all utility services) and North 1-8 areas (water service only) and includes the imposition of capital facility expansion charges to all properties in these areas for the purpose of paying for a portion of the costs associated with the construction and expansion of the City's water (all areas) and sewer (SW 6/7 only) plant facilities and reserving capacity in such facilities. City staff provided the additional capital costs necessary to serve these areas as well as a

schedule of projected service connections (with the first connections projected to be in service mid FY 2013). Based upon the properties in these areas, planned utility services, schedule of projected service connections, and an assumed assessment comparable to the Utility's current impact fee for the utility services available, the Utility would require the plan of annual rate adjustments identified in the table below.

Resume UEP: SW 6/7 & N 1-8	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Water	0.00%	-16.50%	0.00%	3.50%	3.50%
Sewer	0.00%	-16.50%	0.00%	3.50%	3.50%
Irrigation	0.00%	0.00%	0.00%	0.00%	0.00%
Avg. Res. Bill (5,000 GAL)	\$104.97	\$89.20	\$89.20	\$91.99	\$94.87
Monthly Bill Increase / Yr.	\$0.00	(\$15.77)	\$0.00	\$2.79	\$2.88

Schedule 6 of Appendix B presents a summary of the financial management plan for this option, including key assumptions, annual rate adjustments, debt service coverage levels, operating reserves, capital improvement spending, and Utility borrowing requirements.

3.2.7 General Obligation Bonds (Option 5)

This option involves obtaining voter approval to issue general obligation bonds (payable from ad valorem taxes) that would remove the total amount of new long-term borrowing requirements from utility rates identified in the current plan of finance for the Utility. This option would remove \$285 million of current and future debt from the financial management plan for the Utility and result in the plan of rate adjustments identified in the table on the following page.

GO Bonds	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Water	0.00%	-21.50%	0.00%	3.50%	3.50%
Sewer	0.00%	-21.50%	0.00%	3.50%	3.50%
Irrigation	0.00%	0.00%	0.00%	0.00%	0.00%
Avg. Res. Bill (5,000 GAL)	\$104.97	\$84.42	\$84.42	\$87.05	\$89.77
Monthly Bill Increase / Yr.	\$0.00	(\$20.55)	\$0.00	\$2.63	\$2.72

Schedule 7 of Appendix B presents a summary of the financial management plan for this option, including key assumptions, annual rate adjustments, debt service coverage levels, operating reserves, capital improvement spending, and Utility borrowing requirements.

SECTION 4. CONCLUSIONS & RECOMMENDATIONS

This section of the report presents the conclusions and recommendations of the RSA.

4.1 CONCLUSIONS

Based upon the analysis presented herein and the results presented in the prior subsection, we have reached the following conclusions:

Given the operating expenditure cost cutting initiatives undertaken by City staff, the current plan of adopted 8.00% water and sewer rate increases for FY 2012 and FY 2013 can be reduced to 5.50% in each of those respective years, followed by annual 3.50% water and sewer rate increases through FY 2016.

This plan of rate increases would allow the Utility to meet its ongoing operating and capital expenditure requirements and achieve targeted reserve and debt service coverage levels for good utility systems as measured by municipal utility rating agencies and consistent with industry practice.

- The current plan of finance with the issuance of revenue bonds in FY 2011 and FY 2012 will continue to allow the Utility to minimize near-term rate adjustments by utilizing its commercial paper program and deferring full debt service requirements.
- Based upon the assumptions and data supporting the RSA, any one or combination of the options identified by the Working Group would serve to lower the future rate increase requirements of the Utility, starting in FY 2012.

4.2 **RECOMMENDATIONS**

Based upon the analysis presented herein and the conclusions presented in the prior subsection, we recommend the following:

- The City adopt the updated rate adjustment plan for FY 2012 through FY 2016 consistent with its decision to discontinue the UEP in order to support the current projections of the Utility's cost requirements over this planning period, including compliance with all rate covenants associated with existing and new debt service requirements.
- The Utility should continue to perform annual revenue sufficiency updates so that additional or revised information regarding the timing and cost of significant capital projects, customer growth, water demands, as well as updated revenue and operating expenses may be incorporated into the determination of required rate increases that would be necessary in order to allow the Utility to meet its financial requirements and obligations during this time period. Advanced planning will play a prominent role in avoiding significant future rate impacts to the Utility's customers resulting from these variables occurring differently than currently projected.

APPENDIX A

Appendix A – Supporting Financial Schedules for the RSA

Schedule 1 contains the assumptions of the RSA

Schedule 2 identifies the end of FY 2010 fund balances that serve as the FY 2011 beginning balances of the analysis

Schedule 3 provides a listing of the ten-year capital improvement program that was utilized in the RSA

Schedule 4 presents a detailed list of all projected cash inflows from FY 2011-2021

Schedule 5 presents a detailed list of all projected cash outflows from FY 2011-2021

Schedule 6 contains the FAMS-XL © Control Panel that presents a summary of the financial management plan, including annual rate increases, debt service coverage ratios, total CIP spending levels, customer impacts, and fund balances

Schedule 7 presents the projected annual net income, debt service coverage, and cash flow results

Schedule 8 shows the projected funding sources for the capital improvement program

Schedule 9 contains the calculation of projected annual long-term borrowing

Schedule 10 presents a fund-level cash flow reconciliation, providing the beginning balance in each year, the amount utilized for project funding or payment of debt service, interest calculations, and the end of year fund balance

Appendix B – Summary Schedules for Alternative Options

Schedule 1 contains the FAMS-XL © Control Panel for Option 2 (Public Service Tax) that presents a summary of the financial management plan, including annual rate increases, debt service coverage, CIP spending, future borrowing, and fund balances

Schedule 2 contains the FAMS-XL © Control Panel for Option 3A (CFEC: Prior UEP) that presents a summary of the financial management plan, including annual rate increases, debt service coverage, CIP spending, future borrowing, and fund balances

Schedule 3 contains the FAMS-XL © Control Panel for Option 3B (CFEC: New UEP) that presents a summary of the financial management plan, including annual rate increases, debt service coverage, CIP spending, future borrowing, and fund balances

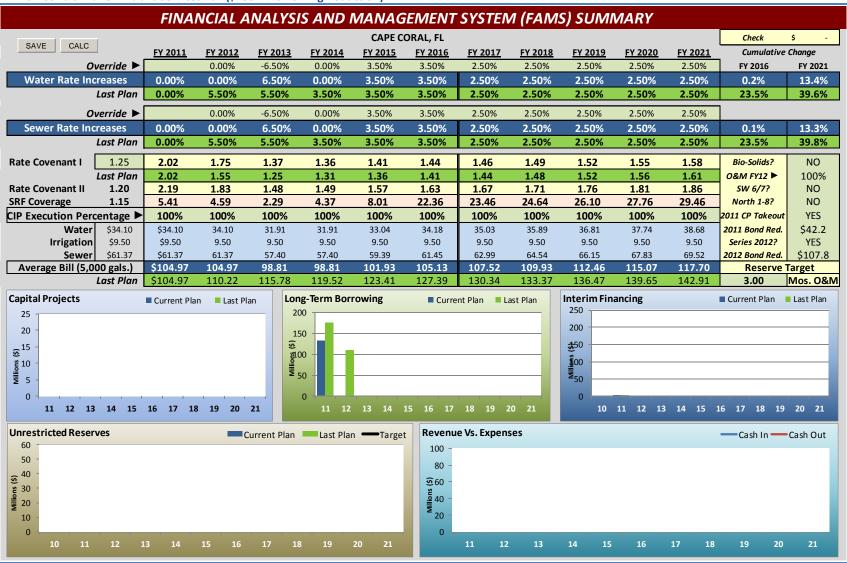

Schedule 4 contains the FAMS-XL © Control Panel for Option 4A (Resume UEP: SW 6/7) that presents a summary of the financial management plan, including annual rate increases, debt service coverage, CIP spending, future borrowing, and fund balances

Schedule 5 contains the FAMS-XL © Control Panel for Option 4B (Resume UEP: N 1-8) that presents a summary of the financial management plan, including annual rate increases, debt service coverage, CIP spending, future borrowing, and fund balances

Schedule 6 contains the FAMS-XL © Control Panel for Option 4C (Resume UEP: SW 6/7 & N 1-8) that presents a summary of the financial management plan, including annual rate increases, debt service coverage, CIP spending, future borrowing, and fund balances

Schedule 7 contains the FAMS-XL © Control Panel for Option 5 (GO Bonds) that presents a summary of the financial management plan, including annual rate increases, debt service coverage, CIP spending, future borrowing, and fund balances
