

Plastic bags & Film Recycling

Did you know?

Plastic bags/film are transformed into many products from trash bags to durable goods such as plastic lumber. It is essential to recycle these materials thereby supporting companies that make these products.

Do's and Don'ts:

-  **Do not** place loose plastic bags/film in your recycling container at home. Plastic bags/film get caught in the sorting equipment at recycling facilities, causing damage and safety issues.
-  **Do not** place recycling in plastic bags before putting them in your recycling container at home.
-  **Hold on** to plastic bags/film and bring them to stores accepting them. Plastic bags can be compressed and take very little space in your home. Store in a place that will ensure bags/film remain clean and dry.
