

# Rogers Bridge

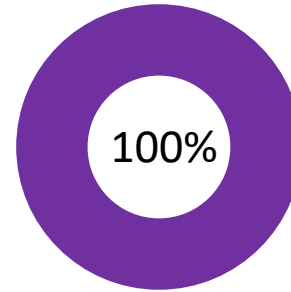

The Rogers Bridge project will determine whether to replace or rehabilitate the existing Rogers Bridge over the Chattahoochee River, will take into account the environmental impacts of each option, and will restore the working bike/ped connection between Duluth and Johns Creek. This will allow access to the planned 133 acre parkland under development in Johns Creek, and will allow Fulton County residents access to Rogers Bridge Park, the Chattahoochee Dog Park, and the future Phase III Western Gwinnett Bikeway currently under development by Gwinnett County.

**Engineering/Design – Complete**

**Construction – Late 2020**

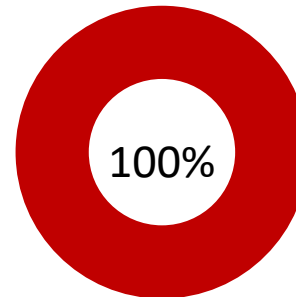

**Construction Duration – Approximately 18 months**
