The Honorable Kelly Burke
Illinois State Representative
5144 W. 95th St.
Oak Lawn, IL 60423

Dear Representative Burke,

As the President of the Village of Hinsdale, I am writing to share with you the apprehension of many Hinsdale residents concerning the implementation of 5G Small Cell Wireless in our community. Numerous residents have expressed alarm with the way in which this new technology will be installed in our community, and that, once installed, the 5G antennae and other 5G equipment will be unsightly and greatly diminish the beauty of our residential community. The Hinsdale Village Board is facing residents' concerns regarding the risks to property value associated with mass implementation of the wireless microcells in front of our homes, schools, parks, and churches throughout our quaint neighborhoods. As you know, the State has deprived local communities like Hinsdale of the ability to enforce its zoning laws to address and manage the installation of 5G equipment and antennae in their neighborhoods.

The Village of Hinsdale seeks to preserve local authority to regulate the deployment of the 5G equipment to address the aesthetic concerns of our residents. Therefore, I am requesting that you, as a sponsor of the Small Cell Wireless Facilities Bill, take action to amend the Bill to ensure that municipalities have the authority to minimize the negative impact small cell wireless equipment and antennae systems will have in our neighborhoods. Local municipality cannot do their job effectively if they are essentially handcuffed by state law from policing the installation of 5G equipment.

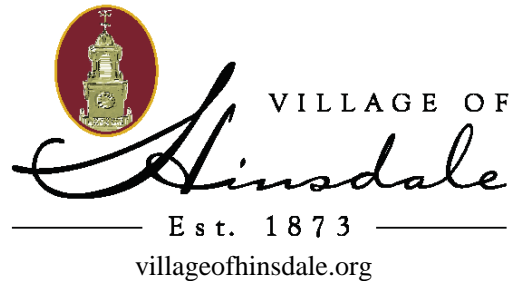

We know that Hinsdale is not the only municipality facing these issues. We request that you join a regional meeting of village presidents and mayors to engage in discussion on the local impacts of the Small Wireless Facilities Deployment Act. Please contact me at your earliest convenience so that we may further discuss this important issue.

Sincerely,

A handwritten signature in cursive script that reads "Tom Cauley".

Therefore, I am requesting that you, as a sponsor of the Small Cell Wireless Facilities Bill, take action to amend the Bill to ensure that municipalities have the authority to minimize the negative impact small cell wireless equipment and antennae systems will have in our neighborhoods. Local municipality cannot do their job effectively if they are essentially handcuffed by state law from policing the installation of 5G equipment.

We know that Hinsdale is not the only municipality facing these issues. We request that you join a regional meeting of village presidents and mayors to engage in discussion on the local impacts of the Small Wireless Facilities Deployment Act. Please contact me at your earliest convenience so that we may further discuss this important issue.

Sincerely,

A handwritten signature in cursive script that reads "Tom Cauley".

Thomas K. Cauley, Jr.
Village President
