

October 25, 2019

Dear Resident,

Recently you emailed the Village expressing an interest in matters related to 5G. Your name has been added to a distribution list. This distribution list will be utilized to provide updates to the Village's activities related to the potential 5G deployment in the Village.

At the October 15 Village Board meeting suggestions were made to have a dedicated place on the Village's website to provide information related to 5G. This has been accomplished and may be found at the button on the Village's Home page entitled 5G antennas or by following this link: <https://www.villageofhinsdale.org/residents/hinsdale5g.php>. Within this page there is also a location entitled "Pending Small Wireless Facilities Permit Applications". Please take note that as of today there have been no applications filed.

Also occurring at the October 15 Village Board meeting was President Cauley naming Trustee Stifflear as the Village Board liaison to a resident driven Task Force that could report back to the Village on the actions taken relative to the resident's opposition to the potential 5G deployment.

It has been brought to my attention that certain residents may have provided their email and contact information to the Village thinking that they were in fact signing up for the Task Force. This is not the case.

While the Village will work collaboratively with the Task Force, the Task Force itself is being managed by residents in the community. If you are interested in becoming part of the Task Force please email Stop5Ghinsdale@gmail.com or visit <https://www.facebook.com/groups/1132188913639899/>

Sincerely,

Luke Stifflear
Village Trustee

Kathleen A. Gargano
Village Manager
