NOTABLE TRAFFIC INFORMATION REQUESTS AND ACTIVITY OCTOBER 2014

Crossing Guards for Hinsdale Middle School: With the completion of construction at Garfield Crossing, the crossing guards previously contracted by the Middle School at 1st & Garfield and 3rd & Garfield are no longer in place as of October 31st.

In-Street Pedestrian Warning Signs: Grant & Ayres and Grant & Center: In-Street pedestrian crossing warning signs were placed at the intersections of Grant & Ayres and Grant & Center in follow-up to continued concerns from residents of the 500 blk N. Grant regarding speed complaints and high use by child pedestrians.

Note: The MUTCD does not provide a numerical benchmark to govern the installation of in-street pedestrian crossing signs. The Village has historically limited the installation of this signage to locations within the Village that generate the highest volumes of consistent daily pedestrian use, including the central business district, and the crosswalk at Adventist Hinsdale Hospital. The installation in this circumstance is directed based upon on-going residential concerns of high volumes of children that reside in the corridor of Grant Street, between North & Ogden Avenue. Speed studies previously conducted in this area found 85th percentile speeds to be proportional with adjacent neighborhood roadways.

York Road Speed Surveys: Speed surveys using stealth radar, selective traffic enforcement, and speed feedback signs continue in response to a resident's request for a left-turn restriction from southbound York Road to eastbound Fuller Street. Officers are being assigned for speed enforcement based upon data collected during this study.

Hinsdale Police Department Training Summary October 2014

(All training is mandatory unless noted otherwise)

From Monday, October 6, 2014 to Thursday, October 9, 2014, Sergeant Steven Ruban attended 32-hour **Managing the FTO Process**. This four day, hands-on course is specifically designed for first line patrol and administrative support services personnel responsible for supervising and managing Field Training Officers and probationary employees. This course emphasizes necessary components of supervising probationers and Field Training Officers at the patrol shift level to ensure that administrative guidelines and legal requirements are met. Two essential supervisory responsibilities were highlighted: (1) the ability to comprehensively examine probationer performance documentation in accordance with the revised, legally defensible standardized (non-numerical) Field Training and Evaluation Process assessment guidelines, and (2) auditing the probationer's on-the-job training to ensure the Field Training Unit utilizes the most appropriate instructional techniques for corrective action. Presentation focused upon discussion of critical Field Training issues as well as hands-on completion of course materials during small group and individual in-class exercises. Students were required to complete out-of-classroom reading assignments. Course content included: Field Training and Evaluation Process structures that work to produce a Self-Reliant Probationer TM; Essential contents of the Probationary Officer's Manual; Definition of Field Training Officer duties/responsibilities; Recruitment, training, mentoring, and compensation issues; Field Training Process software applications, in-class demonstrations; FTO scheduling issues/resource allocation; Understanding performance assessment components; Auditing the Daily Observational Report; Application of standardized evaluation guidelines; Auditing the FTO's application of on-shift instructional techniques; Auditing Probationer training and coaching documentation; Conducting Weekly Performance Summary process meetings; Special focus: the Not Responding to Training Probationer and extension of training: Supervising the development of Performance Improvement Plans; Supervising Probationers during (Step V), the solo patrol certification period; Preparing Probationer Employment Status Reports/Recommendations; Assessing the effectiveness of Field Training Officers and the Field Training Process; Defending against State and Federal wrongful discharge claims.

From Monday, October 6, 2014 to Friday, February 13, 2015, Sergeant Thomas Yehl attended 40-hour **School of Police Staff and Command**.

On Tuesday, October 7, 2014, Officers Thomas Lillie and Louis Hayes attended 8-hour **FIAT Training**.

On Tuesday, October 14, 2014, Detective Sergeant Erik Bernholdt attended 8-hour **Illinois Homicide Investigators 2014 Training Conference**.

On Thursday, October 16, 2014, Detective Kevin Susmarski attended 4 Hour **Asbestos Awareness, Lead Awareness & GHS**.

From Monday, October 20, 2014 to Saturday, October 25, 2014, Officer Thomas Krefft attended **40 Hour Field Training Officer Sokolove Model**. This 40 hour course is specifically designed for experienced, uniformed patrol personnel selected to serve as Field Training Officers for probationary employees. This course emphasizes the FTO's role in assisting probationers in certifying for solo patrol operations by applying the knowledge and skills acquired during Basic Police Training/Certification

and using them according to agency policies, procedures, and community service delivery standards. Instruction in this program highlighted two essential Field Training and Evaluation Process skills: A) the ability to examine and objectively document the probationer's job behaviors using standardized assessment guidelines and, B) the analysis of the probationer's training needs and use of proper instructional techniques for corrective action. Presentation focused on discussion as well as hands-on application of the course materials in small group and individual/student exercises. Students were required to complete out-of-classroom reading assignments from the course text and workbook "Breaking Routine: Field Training Officer." Course content includes: What every FTO really needs to know about the operational structure of the Field Training & Evaluation Process; The Instructional Relay Race: Taking over where basic police training/certification left off; Inventorying the probationer's current knowledge and skill proficiencies; Selection and use of on-the-job instructional techniques; finding the right tools to meet the challenge; Examining effective probationer assessment standards that produce outstanding law enforcement officers; Utilization of standardized evaluation guidelines; Documenting probationer performance; Performance assessment: objectively measuring probationer competence; Documenting the extent of training and coaching; Managing deficient performance and the "Not Responding to Training" probationer; Use of the Probationer Officer Manual as the Field Training playbook; Preparing the Probationer for Community Oriented Policing.

On Tuesday, October 21, 2014, Detective Sergeant Erik Bernholdt and Officers Thomas Lillie and Louis Hayes attended 8-hour **FIAT Training**.

On Wednesday, October 22, 2014, Crime Prevention Officer Michael Coughlin attended 7-hour **DJOA Fall Conference**.

From Tuesday, October 28, 2014 to Wednesday, October 29, 2014, Officer Christopher Washburn attended 16-hour **Acting Patrol Officer in Charge**. This course is for uniform patrol officers, who have supervisory responsibilities and challenges them to evaluate their leadership styles. The management of numerous patrol challenges was discussed in a highly interactive setting with the safe and proper response to situations being the main theme of this program. Topics included: Procedural Challenges Jurisdiction; Discipline; Use of force; Death notification; Hostage/barricaded subject; Psychiatric emergencies; Domestic violence; Vehicle pursuits; Active assailant; Reporting unusual occurrence to command staff and many others; Initial Response to Unusual or Violent Deaths; Crime scene integrity; Search and seizure issues; Identify -- Who, When, Where, What, Why, and How; Response to Critical Incidents; Command station; Setting up perimeters; Manpower, time, equipment; Case Studies; Identifying leadership styles; Decision making process; Alternate course of action.

During the month of October required employees completed and **International Association of Financial Crimes Investigators Membership** online or during roll call.

During the month of October, Officers began their yearly outdoor rifle training and qualifications at the Lemont outdoor range. Officers attended a full day training session focused on: active shooter/killer response; officer- and person-down rescues; mass casualty medical aid; critical incident communication and radio use; officer-involved shooting protocols; general patrol strategy and teamwork; incident command and stabilization. Officers also qualified and trained with the patrol rifle and duty pistols.

Manual on Uniform Traffic Control Devices Warrants

October 2014

The following warrants should be met prior to installation of a **two-way** stop sign:

1. Intersection of a less important road with a main road where application of the normal right-of-way rule would not be expected to provide reasonable compliance with the law;
2. Street entering a through highway or street;
3. Unsignalized intersection in a signalized area; and/or
4. High speeds, restricted view, or crash records indicate a need for control by the STOP sign (defined by 5 or more collisions within a 12-month period).

The following warrants should be met prior to the installation of a **Multi-way** stop sign:

1. Where traffic control signals are justified, the multi-way stop is an interim measure that can be installed quickly to control traffic while arrangements are being made for the installation of the traffic control signal.
2. A crash problem, as indicated by 5 or more reported crashes in a 12-month period, that is susceptible to correction by a multi-way stop installation. Such crashes include right-turn and left-turn collisions as well as right-angle collisions.
3. Minimum volumes:
 - a. The vehicular volume entering the intersection from the major street approaches (total of both approaches) averages at least 300 vehicles per hour for any 8 hours of an average day, and
 - b. The combined vehicular, pedestrian, and bicycle volume entering the intersection from the minor street approaches (total of both approaches) averages at least 200 units per hour for the same 8 hours, with an average delay to minor-street vehicular traffic of at least 30 seconds per vehicle during the highest hour, but
 - c. If the 85th-percentile approach speed of the major-street traffic exceeds 65 km/h or exceeds 40 mph, the minimum vehicular volume warrants are 70 percent of the above values.
4. Where no single criterion is satisfied, but where Criteria 2, 3.a, and 3.b are all satisfied to 80 percent of the minimum values. Criterion 3.c is excluded from this condition.

Option:

Other criteria that may be considered in an engineering study include:

1. The need to control left-turn conflicts;
2. The need to control vehicle/pedestrian conflicts near locations that generate high-pedestrian volumes;
3. Locations where a road user, after stopping, cannot see conflicting traffic and is not able to reasonably safely negotiate the intersection unless conflicting cross traffic is also required to stop; and
4. An intersection of two residential neighborhood collector (through) streets of similar design and operating characteristics where multi-way stop control would improve traffic operational characteristics of the intersection.

The following warrants must be met prior to the installation of a **Yield** sign:

1. On a minor road at the entrance to an intersection where it is necessary to assign right-of-way to the major road, but where a stop sign is not necessary at all times, and where the safe approach speed on the minor road exceeds 10 miles per hour;
2. On the entrance ramp to an expressway where an acceleration ramp is not provided;
3. Within an intersection with a divided highway, where a STOP sign is present at the entrance to the first roadway and further control is necessary at the entrance between the two roadways, and where the median width between the acceleration lane; and
4. At an intersection where a special problem exists and where an engineering study indicates the problem to be susceptible to correction by use of the YIELD sign.
