

Sick Food Employee

Should I Stay Home Or Go To Work??

Our main goal is to help prevent the transmission of diseases through food by infected employees with emphasis on illness due to:

- Norovirus
- Salmonella Typhi.
- Shigella
- Enterohemorrhagic (EHEC)
- Shiga Toxin-producing E Coli
- Hepatitis A

If you or someone in your household is diagnosed with or been exposed to one of these illnesses; please consult with a medical professional on returning to the food service and preferred isolation period.

Below is a chart explaining when someone should stay out of an establishment or safe to report to work.

<u>Stay Home</u>	<u>Report to Work</u>
Diarrhea	Symptom free for 24 hours
Vomiting	Symptom free for 24 hours
Jaundice	After receiving a doctors release to return to work
Sore throat	After starting antibiotics for 24 hours
Fever	No fever present for 24 hours without fever reducing medication
Infected cuts or wounds	Cuts and wounds can be properly covered with approved dressing.
Lesions containing pus on the hand, wrist or an exposed body part	With an approved dressing or covering and a doctors release to return to work
