## Madison County Mental Health Board Mission statement

**"To assure the availability of a comprehensive system of community mental health service for residents of Madison County who are affected by mental illness, Intellectual/developmental disabilities or substance use disorder."**

In 2022, the Madison County Mental Health Board completed a Community Needs Analysis. Interviews with local key informants revealed that one of the strengths of Madison Counties is that there are a wide array of behavioral health and other community support services. However, the key informants also addressed that the community at large continues to be unaware of the services that exist. It was an added concern that the lack of knowledge of local services impacts every aspect of an individual finding, navigating, accessing, and receiving appropriate behavioral health care.

With the findings of the Needs Analysis, the Mental Health Board established the 2023-2025 3-Year Strategic Plan to include a goal to increase public awareness of the behavioral health treatment and support services available to Madison County residents. Through the dedicated work of multiple Graduate Interns from Southern Illinois University, Edwardsville this Behavioral Health Resource Directory is being presented with the most recent revision having been completed by Alexis Belfiore. The Resource Directory will be distributed and followed by community presentations to further educate the public and consumers and their families to increase awareness about where they can turn when finding themselves in need of mental health, substance use disorder, or intellectual/developmental disability services and supports.
