## A MESSAGE FROM THE DIRECTOR of PUBLIC HEALTH

The first case of 2019 Novel Coronavirus (COVID-19) COVID-19 was reported in Illinois in January, 2020. Madison County reported the first case of COVID-19 on March 17, 2020, and the first death of a Madison County resident was reported on April 7, 2020. Health Department staff were consumed with responding to the COVID-19 Pandemic on multiple fronts.

The health department worked tirelessly to respond appropriately in all aspects of the pandemic from distributing PPE to healthcare facilities and first responders to conducting case investigations, contact tracing, outbreak investigations, exercising quarantine and isolation orders, regulating community mitigation strategies, standing up testing centers, consulting with essential businesses, developing data and disseminating information, to facilitating mass vaccination clinics.

Most health department programs and services were postponed or delayed due to the COVID-19 Pandemic response. This 26<sup>th</sup> Annual Report of the Madison County Health Department summarizes clinic and field activities for the fiscal year December 1, 2019 through November 30, 2020.

Sincerely,

Toni M. Corona, B.S., L.E.H.P.  
Director Public Health
