

Peters Road Improvements

Frequently Asked Questions

1) What work will this project include?

Peters Road will be reconstructed from the north side of the Peters Road bridge, extending north to Commerce Road. Liberty and Leverett are also being included in the scope of work. The road will be excavated and re-graded before gravel and asphalt will be placed. The project will also include sidewalk and ramp work at most intersections as well as some driveways and approaches. A map showing the limits of the project has been provided on the back of this sheet.

2) How long will the project take?

The contractor, Artisan Contracting, Inc. out of Highland, MI is proposing to complete this timeline in approximately 13-14 weeks. The contractor has proposed to complete this project in 3 sections:

- a) Peters Road Bridge to just south of the Liberty/Peters intersection.
- b) Liberty and Leverett.
- c) From just south of the Liberty/Peters intersection to Commerce Road.

3) How will traffic be managed during the project?

The road will be closed to thru traffic for the duration of the project. Provisions will be made for resident access. The sectioned approach mentioned above will have the least impact on traffic flow in the neighborhood as residents can enter and exit the road from the opposite ends to avoid the active construction segment. In addition, this will allow for usage of Janowski Park (if appropriate) for the longest possible time before access is disrupted by construction activities.

4) How will this affect access to my driveway?

Most driveways are proposed to be removed and replaced with concrete approaches from the road to the edge of the Right-of-Way (in most cases). This means that at some point during the project, you will not have access to your normal driveway for approximately one (1) week.

5) Will my water or sewer service be affected?

No. No water or sewer work is proposed to occur within this project.

6) How will mail delivery and trash pickup be affected?

Mail service will continue throughout the duration of the project with minimal interruptions. Provisions will be made to ensure that the contractor allows trash services to be maintained.

7) Will my lawn, landscaping, or trees be affected by the project?

Your lawn and existing landscaping may be affected by the project in some areas. If work is to be performed outside of the Village Road Right-of-Way (ROW), you will be contacted to obtain a grading easement or letter of consent. Any disturbed lawn areas will be restored at the end of the project.

8) Who do I contact if I have questions, concerns, or problems?

Please contact the following individual(s):

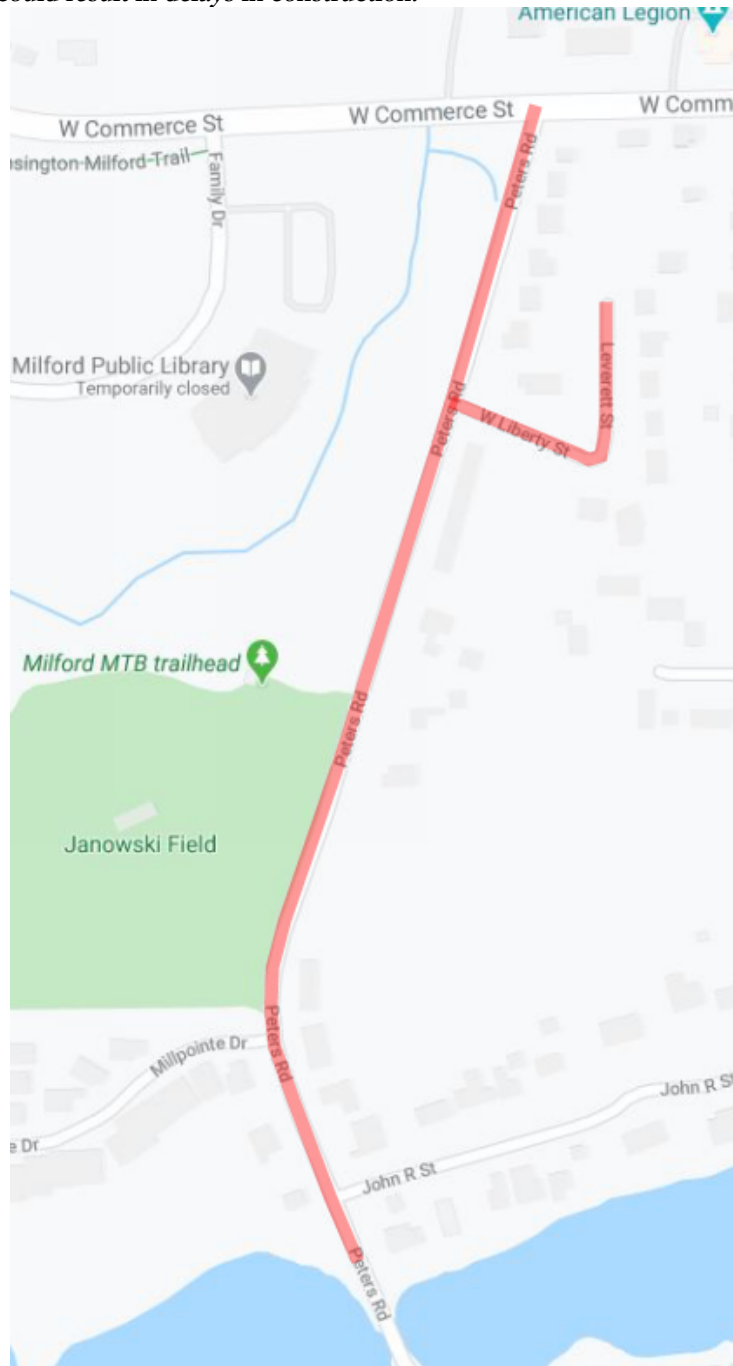

- | | | | | |
|--|------------------|---------------|-------------|--------------|
| • Village (OHM) Inspector: | Micah Maxwell | 810.955.1733 | | |
| • Village (OHM) Field Client Representative: | Mitch Master | 734.855.9876; | Nick Tanton | 810.265.3334 |
| • Village (OHM) Engineer: | Sally Bos | 262.389.9577; | Matt Parks | 248.444.8984 |
| • Village of Milford Contact: | Christian Wuerth | 248.684.1515 | | |

Please join us for a virtual meeting to discuss the project on **Wednesday, April 29, 2020 at 6:30 p.m.** Please register via at www.villageofmilford.org/peters. All questions prior to the meeting can be direct to the Village Engineer, Sally Bos at the number listed above.

With the on-going COVID-19 concerns, the Village, OHM, and construction staff and workers will be taking all appropriate precautionary measures while working in the field. Appropriate social distancing will be maintained. Resident notices regarding the project will be distributed in a safe manner that does not require direct contact between persons.

Safety: *Please understand that this is the most important aspect of this project. Please work with us in respecting all construction signs and drive at a lower speed when in a construction zone. When concrete or asphalt is being placed, please remain off of the concrete until all barricades, barrels, and/or caution tape have been removed. Disregarding barricades, barrels, and/or caution tape could result in delays in construction.*

We realize that this project may cause some inconveniences but reconstructing the road and performing other associated work will improve the community for years to come by providing safe roads and better drainage to the residents in the area. Thank you in advance for your cooperation and patience. Please feel free to contact us if you have any questions or concerns.
