RANCHO SIMI RECREATION AND PARK DISTRICT EAGLE SCOUT PROJECT BENEFITS LOCAL BIKE RIDERS

The Rancho Simi Recreation and Park District (RSRPD) is grateful for the volunteer efforts of local Eagle Scout Chad Agruso in providing the community with a bicycle workstation at the Arroyo Simi Greenway Bike Trail entrance located at Rancho Simi Community Park and Erringer Road.

The heavy-duty workstation is built to withstand the elements and features a pump and several common bicycle maintenance and repair tools to help riders arrive safely at their destination.

One of the main purposes of completing an Eagle Scout project is to demonstrate and develop leadership skills by identifying a need within the community and addressing it. Chad chose to install the bicycle station as his Eagle Scout project because of his love for bike riding and his desire to help others who may encounter issues while riding.

Working with local partners including the Channel Islands Bike Club, Chad raised the necessary funds to complete the project. Chad has been an Eagle Scout for the past seven years with Troop 633.

For more information on completing an Eagle Scout or Girl Scout project with the Rancho Simi Recreation and Park District, please call (805) 584-4400 or email info@rsrpd.us.
