January 17, 2020

Dear Business Leader,

The Chamber's Education Committee continues to encourage our future leaders to learn more about the employment opportunities available to them so we might keep them here in Sussex County in the future.

Sussex County businesses are concerned, as many businesses are throughout the State of NJ, that our millennials have been leaving the state at a higher rate than other groups. This is causing our business leaders to work harder at finding ways to keep Sussex County millennials from leaving the county.

One way to encourage this is to educate our millennials by offering a menu of opportunities that allow them to see firsthand what businesses are in our county and let them see and/or experience the operation of the business. This might be as simple as offering a tour of the company or as involved as offering a structured learning experience through an internship, shadowing program or work study program.

The Chamber, in response to this need, is interested in updating our list of businesses interested in offering some kind of experience/opportunity to students at area high schools, technical schools and colleges. Attached please find a registration form which I ask you to fill out and send back to me at [thorsfield@sussexcountychamber.org](mailto:thorsfield@sussexcountychamber.org). The Chamber will keep a database of offerings in house, as well as on the website for area schools to access. This form will include the company name, offering and contact information. Interested parties will contact the business directly.

Thank you in advance for participating. Your support of this endeavor is very much appreciated.

Sincerely,

Tammie A. Horsfield  
President
